

GET LUCKY GOLF × GLOBAL MARKET SCENARIOS

Market potential & revenue scenarios · August 2026

The thesis in one line. The plan to the 2032 exit needs 22,886 subscribers; golf has 160 million players. That is ~2% of the company's own four-region scenario, with the three-year milestone at just 9,720. Golf travel remains uncounted. The simulator channel — the engine this round funds — is now carried in the forecast as a separate, strippable layer.

The market in four numbers

160M+ golfers worldwide	112.2M adults and juniors outside the US & Mexico ¹ plus 48.1M in the US ²
38,000+ courses	Across 206 of the world's 251 countries ³ — every par-3 a potential Get Lucky hole. Key markets: UK 3,101 · Germany 1,050 · France 804 courses ³
\$1.2bn insurance layer	Hole-in-one / prize-indemnity insurance today, projected to \$2.4bn by 2033 (8.1% CAGR) ⁴ — with no consumer brand on top of it
1 in 12,500	Amateur odds of a hole-in-one ⁵ — every attempt worth paying for, every prize insurable

From market to plan

Funnel step	Size
Golfers worldwide (incl. US)	160M+
Company scenario — four launch regions (US, EU, SA, JP)	~950,000 subscribers
Scenario revenue potential across those regions	\$21m+ / year
The plan to the 2032 exit	22,886 subscribers (~2%)
The 3-year milestone	9,720 subscribers (~1%)

Revenue scenarios — from the pro forma workbook

The model slows growth deliberately (10.5% → 8% → 7% monthly, churn held at 4%) and excludes prize payouts throughout — that risk is carried by Santam (Authorised FSP 3416).

	2026	2029 — 3-year plan	2032 — exit vision
Subscribers	~2,130	~9,720	~22,886
Base plan revenue	R11.2m (\$605k)	R35.3m (\$1.91m)	R83.0m (\$4.49m)
Simulator channel (not contracted)	—	R12.0m (\$649k)	R32.0m (\$1.73m)
Total revenue	R11.2m	R47.3m (\$2.56m)	R115.0m (\$6.22m)
EBITDA margin	~4.5%	~20%	~27%
Valuation milestone	R53.3m (this round)	R129.5m (2.43×)	R690m (12.9×)
Milestone without the simulator channel	R53.3m	R96.8m (1.82×)	R500m (9.4×)

Exit vision assumes 6× revenue — mid-band for engaged-community comparables (Strava, Peloton, Whoop trade at 5–10×); the downside case (3–4×) lands at R250–335m on the base plan. The simulator channel is modelled but **not contracted** — it is reported as a separate layer throughout so the base plan can be underwritten on its own. FX 18.5. Full monthly build in the pro forma workbook; attach-rate sensitivity in the simulator channel document.

Growth engine 1 — Golf travel: the download engine

IN DEVELOPMENT — NOT YET CONTRACTED

An ace on tour refunds the whole trip, insured. Operators pay ~\$1 per booked golfer to offer it — and every travelling golfer installs the app to play.

Golf tourism market	~\$28bn (2025), projected to ~\$62bn by 2034 ⁶
Travelling golfers	12M+ Americans travelled to play golf in each year 2022–2025 ⁷ ; Golfbreaks alone sends ~220,000 golfers a year ⁸
Year-1 target	200,000+ app installs (company target)

The \$1 fee is not the prize — **distribution is**. Every install is a golfer one tap from the \$10/month global subscription; the travel hook is a funnel, not a revenue line.

Growth engine 2 — Simulators: the channel this round funds

IN THE PLAN — TARGET PARTNER, NOT YET CONTRACTED

A \$1 in-sim challenge for a \$1,000 insured prize, built into the operator's software. No hardware, no cameras, no installation — the sim itself is the verifier. This is the one growth engine carried in the forecast, and the reason the forward milestones step up: **R12.0m of revenue by 2029, R32.0m by 2032**. Travel and cross-sport remain excluded.

Global simulator market	~\$2.4bn (2025), projected to ~\$4.8bn by 2035 ⁹
South Korea alone	~94M simulator rounds a year ¹⁰ ; a \$1.6bn screen-golf industry across ~9,000 venues ¹¹
United States	19M Americans played exclusively off-course (simulators, ranges, golf entertainment) in 2025 ²
Leading operators	Golfzon (6,500+ venues, ~60% of the commercial market ¹²) · Trackman · Full Swing · Foresight Sports · X-Golf · Topgolf Swing Suite · Kakao VX

How the revenue is built

Unit	\$1 entry · \$1,000 insured prize · split 46 / 30 / 24 (Get Lucky / operator / insurer). The operator takes more than a course's 10% because it brings the venues, the software and the distribution — Get Lucky installs no hardware.
Volume basis	Attach rate against South Korea's ~94M annual simulator rounds alone¹⁰ . Golfzon's venues outside Korea and every other operator listed above are excluded.
Ramp	2026 integration year (no revenue) · 0.3% (2027) · 0.8% (2028) · 1.5% (2029) · 4.0% (2032)
Revenue to Get Lucky	R2.4m (2027) · R6.4m (2028) · R12.0m (2029) · R32.0m (2032), at ~50% EBITDA margin — software-only
Funding	20% of the R8.0m raise (~R1.6m) is allocated to the integration work this channel requires

Sensitivity — the 2029 milestone at four attach rates

Attach rate	Simulator revenue	Total revenue	Valuation (2.74×)	Investor multiple
0% — no partnership lands	—	R35.3m	R96.8m	1.82×
0.5% — slow adoption	R4.0m	R39.3m	R107.6m	2.02×
1.5% — the plan	R12.0m	R47.3m	R129.5m	2.43×
3.0% — strong adoption	R24.0m	R59.3m	R162.5m	3.05×

Investor multiple measured on the R53.3m post-money of this round. **No agreement exists with Golfzon or any other simulator operator**, and there is no assurance one will be concluded.

The Ernie route to market. A founding partner named Ernie Els gets Get Lucky the meeting with every operator on that list — his standing in the game, his course-design network and The Els Club venues open doors an unknown start-up cannot.
